

Association of Local Government Information Management

Locofone

In a new initiative for your organisation, ALGIM has reached a business arrangement with Fonebank, a world leader in the reuse & recycling of mobile phones and tablets.

Recover your telecommunications investment by recycling your used mobile phones and tablets through Locofone. ALGIM have ensured that Locofone's return is much greater than other mobile phone recycling initiatives.

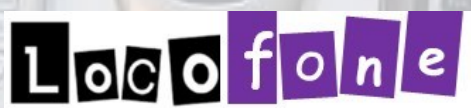

Reuse - devices are refurbished for sale in third world countries, providing affordable communication in areas where telecommunications are inefficient or non existent.

Recycle - zero landfill pollution. Obsolete devices, or those beyond economic repair are recycled according to NZ recycling standards.

Community - You can choose to have the reimbursement returned to your Council, or donated to a charity of your choice, such as Starship.
